<u>What Is Dyslexia?</u>

Dyslexia is a common learning difficulty that can cause problems with reading, writing and spelling.

It's a specific learning difficulty, which means it causes problems with certain abilities used for learning, such as reading and writing.

Unlike a <u>learning disability</u>, intelligence isn't affected. It's estimated up to 1 in every 10 people in the UK has some degree of dyslexia.

Dyslexia is a lifelong problem that can present challenges on a daily basis, but support is available to improve reading and writing skills and help those with the problem be successful at school and work.
